U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No. \_\_\_\_\_\_

-2-

Serial Number: 09/592907

Art Unit: 3753

This action is responsive to the communication filed June 13, 2000.

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-5, drawn to a cap assembly, classified in Class 251, subclass 367.
- II. Claims 6-16, drawn to a valve, classified in Class 251, subclass 129.18.
- III. Claims 17-20, drawn to a method of making a valve, classified in Class 29, subclass 890.124.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. (M.P.E.P. § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

-3-

Serial Number: 09/592907

Art Unit: 3753

claimed in that the grounds of rejection and/or reasons for allowance of the combination claim(s) are necessarily predicated on consideration of the additional features recited therein and not found in the subcombination claim(s). The subcombination has separate utility such as a cap for diaphragm valve or a plate type armature valve, for example.

Inventions III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case the product as claimed can be made by another an materially different process such as using adhesive bonding

Because these inventions are distinct for the reasons given above and the examination required for each Group is not the same as for the other Group(s) restriction for examination purposes as indicated is proper.

Serial Number: 09/592907 -4-

Art Unit: 3753

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Any inquiry concerning this communication should be directed to Examiner Fox at (703) 308-2595 or John.Fox@uspto.gov. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0861. The fax number for Examiner Fox is (703) 746-4602. The Supervisory Primary Examiner for Art Unit 3753 is Michael Buiz who can be reached at (703) 308-2580 or at Michael.Buiz@uspto.gov.
